New fellowship opportunity offered by SPEED Youth!

SPEED's youth development programme, SPEED Youth, is preparing and empowering youth (ages 12-18) to become healthy, competent, and contributing members of society and to undertake leadership roles in their communities. For this reason, SPEED is introducing the Youth Development Fellowship, focused on developing the skills of people working in the youth development field.

The programme will run from March through

early June and consists of weekly sessions during the work week, 1-2 Saturday sessions a month, homework assignments and a weekend long retreat March 23-25. In addition, there is a three month practical training with SPEED Youth from June to August (minimum of 5 hours a week). After successful completion of programme they will have opportunities for part-time/full time employment with SPEED at the end of the Fellowship; Leadership Training; Skill development; and certification.
